

**APPLYING TO THE ELECTRICAL ENTRY PROGRAM?
BE READY TO DO THE MECHANICAL REASONING ASSESSMENT!**

TWO important bits of information before doing the assessment are:

- ➡ **No need to study for this assessment!** This assessment requires common sense. You are given problems, presented with diagrams and asked for the most logical solution.
- ➡ **Know where and when to test:** North Island College provides **group testing** on all campuses. Check with your campus for times.
- ☆ **Individual testing is available through the Access for Students with Disabilities program. Contact your local campus to arrange individual testing if you require it or to get more information.**
- ☆ **Assessment is also available off campus**, applications are available on line:
http://www.nic.bc.ca/PDF_docs/OffCampusAssessment_App.pdf

ADDITIONAL INFORMATION:

Electrical Foundations Mechanical Reasoning Assessment

- If you want you can search on the Internet for 'sample Mechanical Reasoning questions'. Some websites provide questions and answers.
- NB Successful entry into the Electrical Foundations program also requires English 11, Math 11 and Physics 11 (See NIC Calendar for more information: NIC ENG 052 C+, MAT 053 C+, PHY 050 C)
