

Campbell River Campus Expansion

WEEKLY UPDATE | For the week of Feb. 5, 2018

Welcome to the first Campbell River campus expansion weekly update — your source for key information on safety, milestones, photos and status updates at NIC's growing Campbell River campus. For more information, please contact christiana.wiens@nic.bc.ca.

What you need to know this week

Watch for additional traffic as, weather permitting, trucks arrive to deliver concrete for the Building 300 (aquaculture lab and classrooms). Please use caution and be aware that no one is permitted to enter the active construction site without authorization.

Photo of the week

The installation of steel for the new Heavy Duty Mechanic (#100) building is nearing completion in Campbell River. The cladding, or outside material, is now being applied. Have a Campbell River campus photo you would like to share? Email your photo to christiana.wiens@nic.bc.ca. If we use your photo, you could win NIC merchandise.

High School Trades Building – Building 500

Status update: Foundations for the Timberline Trades Building - Building 500 have been poured and floor re-bar and prep completed. Concrete was poured February 9, with new photos expected next week.
